

Coding&Solution

Date	15 July 2026
TeamID	SWUID2026221635
ProjectName	A Comprehensive Measure of Well-Being (HDI Prediction & Analysis)
MaximumMarks	5Marks

Coding&Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link/ URL	https://github.com/PMahitha31/A-Comprehensive--Measure-of--Well-Being/tree/main
Programming Language(s)	Python, HTML5, CSS3, JavaScript
Framework(s) Used	Flask Framework
Key Features Implemented	• Interactive dashboard sliders to dynamically calculate HDI tiers. • Pre-trained Scikit-learn Classifier backend. • Visual bar charts comparing user inputs with global averages. • User login and session management.
Pending/Incomplete Features	Real-time database update of development statistics through external API schedules.
Setup/Run Instructions	1. Clone the repository: <code>git clone https://github.com/PMahitha31/A-Comprehensive--Measure-of--Well-Being.git</code>

	2. Install packages: <code>pip install -r requirements.txt</code> 3. Open Anaconda Navigator and launch Jupyter to test the model script. 4. Run Flask backend: <code>python app.py</code> 5. Access UI in browser at:
--	--

CodeQualityChecklist

S.No	Criteria	Status(Yes/No)
1	Codeismodularandorganizedintofunctions/classes	Yes
2	Meaningfulvariableandfunctionnamesareused	Yes
3	Codeincludescomments/documentationwherenecessary	Yes
4	Errorhandlingisimplementedforcriticaloperations	Yes
5	Theapplicationrunswithoutcriticalerrors	Yes
6	Codeiscommittedtoaversioncontrolrepository	Yes

AdditionalNotes/Comments:

The model achieves high accuracy on the validation set, and predictions are served instantly on the frontend UI.
