

Project Executable Files

Date	15 July 2026
Team ID	SWUID2026221635
Project Name	A Comprehensive Measure of Well-Being (HDI Prediction & Analysis)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA

9	Test files and test results	No
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

HDI_PREDICTOR
├── data
│   └── hdi_dataset.csv
├── static
│   ├── correlation_heatmap.png
│   ├── feature_scatterplots.png
│   └── style.css
├── templates
│   ├── index.html
│   └── result.html
├── app.py
├── hdi_model.pkl
├── README.md
├── requirements.txt
└── train_model.py
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials (Demo)	NA
Platform Provider	Local Flask Application
Repository Link	https://github.com/PMahitha31/A-Comprehensive--Measure-of--Well-Being
Demo Video Link	https://drive.google.com/file/d/170MW3W7WbZbAL7JnvinxB6M5S8VGqNHH/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Prerequisites

- Python 3.x
- Flask
- Pandas
- NumPy
- Scikit-learn
- Matplotlib
- Seaborn

Steps

1. Open the project folder in Visual Studio Code.
2. Install the required dependencies:

```
pip install -r requirements.txt
```
3. Run the Flask application:

```
python app.py
```
4. Open the browser and navigate to:

```
http://127.0.0.1:5000
```
5. Enter the required HDI parameters.
6. Click "Predict HDI Score" to view the prediction result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application runs only on the local Flask server	Can be deployed on Render or another cloud platform in the future.
2	Prediction accuracy depends on the quality of the dataset	Use a larger and updated dataset for improved accuracy.
3	No user authentication or database support	Can be added in future versions.
